

MOIL AI Production Forecast Report

Total Mines Analyzed: 15

High Risk Mines: 5

Medium Risk Mines: 5

Low Risk Mines: 5

Mansar

Expected Production: 135000 MT

Predicted Production: 89037 MT

Estimated Shortfall: 45963 MT

Risk Level: MEDIUM

Equipment Availability: 81.7 %

Downtime Hours: 37.9

Blast Delay Days: 7

Major Contributing Factors:

- Moderate Blasting Delays

Recommendations:

- Review blasting schedule

Kandri

Expected Production: 192000 MT

Predicted Production: 112392 MT

Estimated Shortfall: 79608 MT

Risk Level: HIGH

Equipment Availability: 76.2 %

Downtime Hours: 69.4

Blast Delay Days: 5

Major Contributing Factors:

- Low Equipment Availability
- Excessive Equipment Downtime

Recommendations:

- Improve equipment utilization
- Reduce equipment downtime

Ukwa

Expected Production: 150000 MT

Predicted Production: 90497 MT

Estimated Shortfall: 59503 MT

Risk Level: HIGH

Equipment Availability: 67.5 %

Downtime Hours: 32.4
Blast Delay Days: 3

Major Contributing Factors:

- Critical Equipment Availability

Recommendations:

- Increase preventive maintenance

Tirodi

Expected Production: 210000 MT
Predicted Production: 140150 MT
Estimated Shortfall: 69850 MT
Risk Level: HIGH
Equipment Availability: 77.3 %
Downtime Hours: 33.6
Blast Delay Days: 4

Major Contributing Factors:

- Low Equipment Availability

Recommendations:

- Improve equipment utilization

Gumgaon

Expected Production: 87000 MT
Predicted Production: 58034 MT
Estimated Shortfall: 28966 MT
Risk Level: MEDIUM
Equipment Availability: 88.2 %
Downtime Hours: 69.9
Blast Delay Days: 6

Major Contributing Factors:

- Excessive Equipment Downtime
- Moderate Blasting Delays

Recommendations:

- Reduce equipment downtime
- Review blasting schedule

Ramtek (Parseoni)

Expected Production: 54000 MT
Predicted Production: 39978 MT
Estimated Shortfall: 14022 MT
Risk Level: LOW

Equipment Availability: 87.1 %
Downtime Hours: 44.5
Blast Delay Days: 3

Major Contributing Factors:

- Elevated Equipment Downtime

Recommendations:

- Improve maintenance scheduling

Sitasaongi

Expected Production: 72000 MT
Predicted Production: 50337 MT
Estimated Shortfall: 21663 MT
Risk Level: MEDIUM
Equipment Availability: 78.2 %
Downtime Hours: 32.6
Blast Delay Days: 2

Major Contributing Factors:

- Low Equipment Availability

Recommendations:

- Improve equipment utilization

Parsoda

Expected Production: 39000 MT
Predicted Production: 22308 MT
Estimated Shortfall: 16692 MT
Risk Level: LOW
Equipment Availability: 75.1 %
Downtime Hours: 58.5
Blast Delay Days: 8

Major Contributing Factors:

- Low Equipment Availability
- Elevated Equipment Downtime
- Moderate Blasting Delays

Recommendations:

- Improve equipment utilization
- Improve maintenance scheduling
- Review blasting schedule

Miragpur

Expected Production: 27000 MT

Predicted Production: 19506 MT
Estimated Shortfall: 7494 MT
Risk Level: LOW
Equipment Availability: 81.4 %
Downtime Hours: 33.9
Blast Delay Days: 3

Major Contributing Factors:

No major issues detected.

Recommendations:

No recommendations required.

Netra

Expected Production: 48000 MT
Predicted Production: 27828 MT
Estimated Shortfall: 20172 MT
Risk Level: MEDIUM
Equipment Availability: 73.6 %
Downtime Hours: 55.2
Blast Delay Days: 6

Major Contributing Factors:

- Low Equipment Availability
- Elevated Equipment Downtime
- Moderate Blasting Delays

Recommendations:

- Improve equipment utilization
- Improve maintenance scheduling
- Review blasting schedule

Beldongri

Expected Production: 39000 MT
Predicted Production: 27306 MT
Estimated Shortfall: 11694 MT
Risk Level: LOW
Equipment Availability: 89.9 %
Downtime Hours: 19.2
Blast Delay Days: 10

Major Contributing Factors:

- Severe Blasting Delays

Recommendations:

- Optimize blasting operations

Gowari Wadhona

Expected Production: 27000 MT
Predicted Production: 18335 MT
Estimated Shortfall: 8665 MT
Risk Level: LOW
Equipment Availability: 86.6 %
Downtime Hours: 20.3
Blast Delay Days: 10

Major Contributing Factors:

- Severe Blasting Delays

Recommendations:

- Optimize blasting operations

Balaghat

Expected Production: 263170 MT
Predicted Production: 189843 MT
Estimated Shortfall: 73327 MT
Risk Level: HIGH
Equipment Availability: 85.4 %
Downtime Hours: 65.8
Blast Delay Days: 2

Major Contributing Factors:

- Excessive Equipment Downtime

Recommendations:

- Reduce equipment downtime

Chikla

Expected Production: 176786 MT
Predicted Production: 126949 MT
Estimated Shortfall: 49837 MT
Risk Level: MEDIUM
Equipment Availability: 78.1 %
Downtime Hours: 28.8
Blast Delay Days: 1

Major Contributing Factors:

- Low Equipment Availability

Recommendations:

- Improve equipment utilization

Dongri Buzurg

Expected Production: 200000 MT

Predicted Production: 113567 MT

Estimated Shortfall: 86433 MT

Risk Level: HIGH

Equipment Availability: 69.4 %

Downtime Hours: 65.1

Blast Delay Days: 3

Major Contributing Factors:

- Critical Equipment Availability
- Excessive Equipment Downtime

Recommendations:

- Increase preventive maintenance
- Reduce equipment downtime
